

THE MATEL INTERNATIONAL

(EXPORT & IMPORT CO.)

INDIA'S ORGANIC COTTON

We understand your needs and are dedicated to providing personalized solutions that exceed your expectations

Our Company profile

The Matel Exports is a premium raw cotton exporter and supplier in India. We export raw cotton of different staple lengths according to the customer's needs. Our top-quality cotton is used to make various high-quality products worldwide. We have a team of skilled experts to ensure the quality of our raw cotton. Our quality analysis includes checking various parameters like color, staple length, strength, and micronaire. The Matel Exports is a reliable raw cotton exporter and supplier that provides high-quality raw cotton at affordable prices. We also ensure that the cotton bales are packed well so that they can be stored for an extended period and can be shipped without affecting the quality of the product.

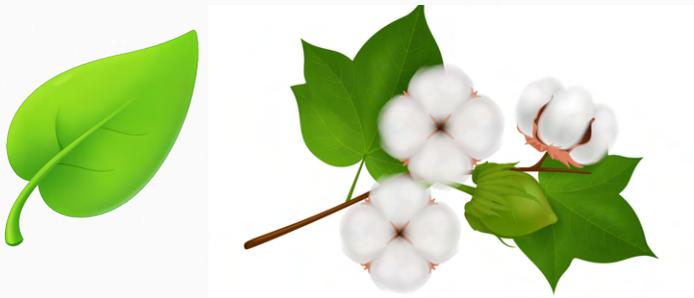

When referring to raw cotton, there are different types based on their quality, origin, and processing methods.

Conventional Cotton :

Grown with the use of synthetic fertilizers and pesticides. It's the most common type of cotton in the world.

Organic Cotton :

Grown without synthetic chemicals, using only natural methods. It's more sustainable and eco-friendly but tends to be more expensive

✓ About Us!

Wide Procurement Network

We are providing India's Pure Organic Raw Cotton for your satisfaction and go the extra mile to ensure a positive experience with Dedicated customer support, Focus on quality and Commitment to sustainability.

✓ Our Mission

Assured Quality

To provide high-quality of Raw Cotton that meet global standards. To ensure every trade is seamless, compliant, and customer-focused.

✓ Our Vision

Farm to Fabric Traceability

To become a globally admired import-export partner, known for delivering trust, transparency, and top-quality products – while uplifting Indian industries on the world stage and fostering ethical global trade.

 **Mech-1 Cotton**

 **J34 Cotton**

 **MCU 5 Cotton**

We are Also Offering 100% Cotton Yarn, Cotton Waste, Grey Fabric & Finished Fabric etc. We are Connected from Farm to Fashion Industries.

OUR PRODUCTS RANGE

Raw Cotton:

What is raw cotton?

Raw cotton, also known as cotton fiber or cotton bales, is the initial, unprocessed form of cotton after it has been separated from the cotton plant's seeds. It consists of the raw fibers, still retaining some natural oils and waxes, and may include small plant parts and trash. This raw material is then further processed to create yarn, fabric, and other cotton-based products.

•Contains seeds:

The harvested cotton boll, or "raw cotton," includes both the cotton fibers and the seeds.

•Contains impurities:

also includes other plant matter, like stems, leaves, and dirt, collectively called "trash".

•Requires further processing:

Raw cotton needs to be ginned before it can be used for textile manufacturing or other applications

Ginned Cotton:

•Seed-free:

Ginning removes the seeds from the cotton fibers

•Reduced trash:

Ginning removes the seeds from the cotton fibers.

•Ready for further processing:

Ginned cotton is the form used in spinning mills to produce yarn and fabrics.

•May still contain some impurities:

Modern gins are highly efficient, but some very fine trash and short fibers may remain.

•Processing for Use:

Before raw cotton can be used to make textiles, it typically undergoes further processing, including cleaning, carding, and potentially bleaching and dyeing

•Uses:

While raw cotton is the foundation for various textile products, it can also be used in its raw form for certain applications like stuffing or cushioning where absorbency and aesthetics are not critical.

The Matel Exports Raw Cotton Specifications

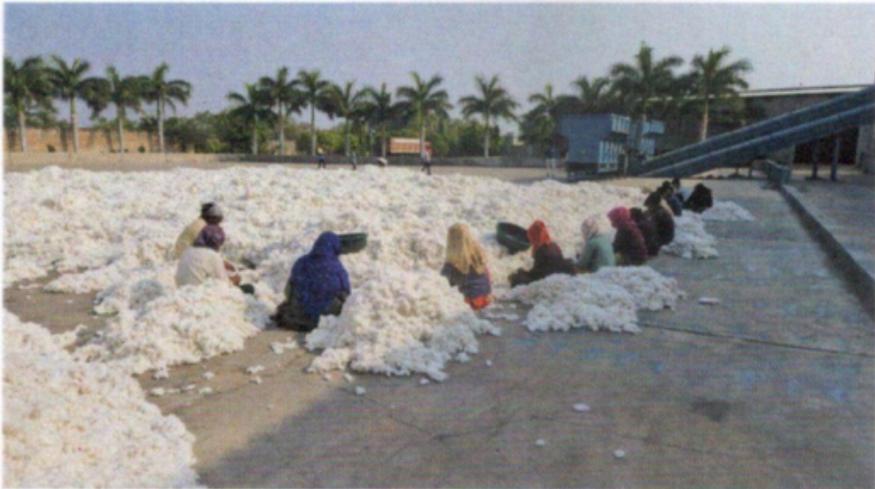

Variety	Staple length (mm)	Micronaire Value	Strength GPT(HVI Mode)
MCU 5	32 to 34	3.5 to 3.7	30
Shankar 6	27.5 to 29.5	3.5 to 4.9	28
MECH-1	27 to 29	3.5 to 4.9	27
J-34	24 to 27	4.0 to 4.9	26
V 797	20 to 22	4.5 to 6.0	24

The Matel Group of Exports cultivates, exports and supplies all types Indian Raw Cottons from various cotton growing Indian states - mainly Shankar 6 Cotton. India has the advantage of growing all species of cotton i.e. from short staple 20mm & below, medium staple (20.5 to 24.5mm), medium long (25.0 to 27.0mm), long (27.5 to 32.0mm) and extra long staple cottons (32.5mm and above). India produce large number of varieties and hybrids, number of varieties in cultivation exceeds seventy-five. However, 98 per cent of the production is contributed by about 25 varieties. In India, the states of Gujarat, Maharashtra, Andhra Pradesh and also Madhya Pradesh are the leading cotton producing states. These states have a predominantly tropical wet and dry climate.

OUR COTTON GINNING MODERN PROCESS
